Methodological note

New National Classification of Economic Activities 2009 (CNAE 2009)

The European Parliament and Council passed the new classification of economic activities for statistical purposes within the European Union, known as NACE Rev.2, on 20 December 2006, via Regulation (EC) no. 1893/2006.

In order to be able to adapt the European classification to their reality, each Member State has compiled national versions that are compatible with NACE Rev.2. The national version of NACE Rev.2 in Spain is CNAE 2009, passed by Royal Decree 475/2007, of 13 April 2007 (BOE of 28 April 2007).

The adaptation to the new classification has caused changes in the Bankruptcy Proceedings Statistics, specifically in one of the variables studied: main economic activity of the company declared bankrupt. For some activities, the new classification has only caused a change in code, and not in content; in other cases, however, some activities have changed to belong to different branches or sectors. Thus, to quote an example, "Property development" has moved from the Services sector to the Construction sector. "Collection and treatment of wastewater" has moved from the Services sector to the Industry sector. Conversely, "Publishing" has moved from Industry to Services.

In order to guarantee the comparability of the information over time, the INE will publish the retrospective series of the number of companies declared bankrupt by main economic activity in the new classification, CNAE-2009 in this new classification in INEBASE.

The following link on the INE website offers complete information regarding all of the changes arising from the new encoding of branches of activity:
