36.5% of trips in the third quarter corresponded to summer holidays<sup>1</sup>. Considering also the month of June, residents made 23.2 million summer vacation trips, 41.9% more than the previous year. These trips have an average duration of 12.3 overnight stays, 8.4% less than in the same period of 2020.

During the first nine months of 2021, trips made by residents increased by 26.3% as compared with the same period of the previous year. Domestic trips rose by 28.2%, while international trips fell by 5.9%.

<sup>1</sup> Summer holidays are considered to be trips of five or more nights, made between June and September, for any reason other than health, education, work or incentives.

If we analyse the trips by weeks<sup>2</sup>, an increase was observed in all the weeks of the second and third quarters compared to 2021. As of June, trips began to recover levels close to 2019.

## Trips per week. Year 2021

## Trips according to purpose, accommodation and main transport

*Leisure, recreation and holiday* trips, which were the main reason for 59.7% of trips made in the third quarter, increased by 26.2%. In turn, *Visits to relatives or friends*, which represented 32.0% of the total, registered an annual increase of 19.6%.

Trips for *Business and other professional reasons* increased by 8.2%, and trips made for *Other reasons*<sup>3</sup> increased by 38.6%.

The main reason for trips during the third quarter was leisure, whether for domestic (60,0%) or foreign (55,2%) destinations.

In the first nine months of 2021, leisure trips rose by 27.4%, visits to family or friends by 20.8%, business trips by 30.4% and those made for other reasons by 48.6% .

<sup>2</sup> In order to study trips by return date, trips to workplaces and centres of study were excluded (2.5% of the trips in the quarter) Also note that the last week of the third and fourth quarters of the graph have eight days, to complete the days in the quarter.

<sup>3</sup> *Other reasons* include shopping tourism, travel to places of study, other trips for education and training, health, religious reasons, company incentive trips and all other trips for personal reasons not included in another category.

## Main destinations

The main destination Autonomous Communities for trips by residents in the third quarter of 2021 were Andalucía (with 20.0% of the total), Cataluña (13.5%) and Comunitat Valenciana (12.4%).

If domestic trips of residents are related with the population of the destination, the phenomenon of trips was more intense in Cantabria (with 2,744 trips per 1,000 inhabitants<sup>4</sup>), Castilla y León (with 1,937) and Aragón (1,643).

<sup>4</sup> For the calculation of this indicator, we have used both the trips of the population aged 15 and over as well as the population aged 15 and over residing in the destination (calculated as an average of the population for each of the months of the quarter).

## Average daily expenditure per person by AC of residence. Third quarter of 2021.

## Monthly data

In July, 18.4 million trips were made, in August 24.1 million and in September 14.6 million. Trips made in August had the longest average duration (7,6 overnight stays).

August was the month with the lowest percentage of trips within the Autonomous Community of residence (42.5%). This was due both to the higher percentage of trips to other Autonomous Community (51.6% of the total) and abroad (6%).

Leisure was the main reason for travelling every month, representing 63.0% of trips. Trips for professional reasons reached their minimum in August (2.6% of the total).

September was the most important month for non-market (58.7%) and hotel (24.3%) accommodations. The rest of the market accommodations had the highest registry in August (22.7%).

## Data Review and Update

The data published today is final and is not subject to further revision. All results are available on INEBase.

<sup>6</sup> An excursion is considered any visit without an overnight stay outside the person's usual environment. Trips that are part of someone's normal routine are excluded, as are those made from second homes, from a cruise ship, or from any other accommodation other than the usual one.

## Methodological note

The main objective of the Residents Travel Survey (ETR/FAMILITUR) is to provide information on the trips and excursions carried out each month by the population resident in Spain, both within the country and abroad, and their main characteristics (duration, expenditure, reason, accommodation, etc.).

In addition, the survey provides annual information on the percentage of the population travelling for personal reasons and investigates the reasons given by those who do not travel.

**Type of operation:** quarterly continuous survey.

**Population scope:** Resident population aged 15 and over in family dwellings (indirect information regarding trips taken by children under 15 is also provided).

**Geographical scope:** the entire national territory.

**Reference period of the results:** month, quarter, year (depending on the variable and the degree of disaggregation).

**Sample size:** the effective monthly sample is around 8,200 persons, who provide information on the trips completed in the two months prior to the interview. Thus, the results of a reference month are obtained from around 16,400 questionnaires.

**Type of sampling:** stratified two-stage random sampling. The framework is the set of main dwellings that have collaborated in the Continuous Household Survey (CHS). In each stratum of the CHS, the first stage units are the main family dwellings and the second stage units are the persons aged 15 and over residing in these dwellings. A variable defining the household's propensity to travel is used as a stratification criterion.

The selected persons collaborate three times in alternate months over six months, leave the sample one semester, and are interviewed another three times during the following semester.

**Collection method:** computer-assisted telephone or personal interviews, online questionnaire (since 2018).

For further information, the [methodology](#) and the [standardised methodological report](#) of the survey can be consulted on the INE website.

INE statistics are produced in accordance with the Code of Good Practice for European Statistics, which is the basis for the institution's quality policy and strategy. For more information, see the section on [Quality in the INE and Code of Good Practices](#) on the INE's website.
