Abroad	2,809,910	7.7	597.3	6.3	-37.4

If we analyse the trips by weeks<sup>1</sup>, an increase can be observed in all the weeks since the second quarter of 2021 compared to the year 2020. As of June and during the fourth quarter, trips begin to recover to levels close to 2019.

<sup>1</sup> In order to study trips by return date, trips to workplaces and centres of study were excluded (5.5% of the trips in 2021) Also note that the last week of the third and fourth quarters of the graph have eight days, to complete the days in the quarter.

## Trips per week. Year 2021

## Trips according to purpose, accommodation and main transport

*Leisure, recreation and holiday* trips, which were the main reason for 42.6% of the total, increased by 172.5% in the fourth quarter. Trips for *Visits to relatives or friends*, which represented 40.3% of the total, registered an annual increase of 97.0%.

In turn, trips taken for *Business and other professional reasons* and those made for *Other reasons*<sup>2</sup> increased by 35.1% and 88.5%, respectively.

The main reason for travelling within Spain during the fourth quarter was visiting relatives or friends (41.7%). On the other hand, most trips abroad were made for leisure purposes (59.8%).

<sup>2</sup> *Other reasons* include shopping tourism, travel to places of study, other trips for education and training, health, religious reasons, company incentive trips and all other trips for personal reasons not included in another category.

### Main destinations

The main destination Autonomous Communities for trips by residents in the fourth quarter of 2021 were Andalucía (with 17.2% of the total), Cataluña (12.5%) and Comunitat Valenciana (9.5%).

If domestic trips of residents are related with the population of the destination, the phenomenon of trips was more intense in Aragón (with 1,483 trips per 1,000 inhabitants<sup>3</sup>), Castilla y León (with 1,440) and Castilla–La Mancha (1,174).

<sup>3</sup> For the calculation of this indicator, we have used both the trips of the population aged 15 and over as well as the population aged 15 and over residing in the destination (calculated as an average of the population for each of the months of the quarter).

## Data Review and Update

The data published today is final and is not subject to further revision. All results are available on INEBase.

## Methodological note

The main objective of the Residents Travel Survey (ETR/FAMILITUR) is to provide information on the trips and excursions carried out each month by the population resident in Spain, both within the country and abroad, and their main characteristics (duration, expenditure, reason, accommodation, etc.).

In addition, the survey provides annual information on the percentage of the population travelling for personal reasons and investigates the reasons given by those who do not travel.

**Type of operation:** quarterly continuous survey.

**Population scope:** Resident population aged 15 and over in family dwellings (indirect information regarding trips taken by children under 15 is also provided).

**Geographical scope:** the entire national territory.

**Reference period of the results:** month, quarter, year (depending on the variable and the degree of disaggregation).

**Sample size:** the effective monthly sample is around 8,200 persons, who provide information on the trips completed in the two months prior to the interview. Thus, the results of a reference month are obtained from around 16,400 questionnaires.

**Type of sampling:** stratified two-stage random sampling. The framework is the set of main dwellings that have collaborated in the Continuous Household Survey (CHS). In each stratum of the CHS, the first stage units are the main family dwellings and the second stage units are the persons aged 15 and over residing in these dwellings. A variable defining the household's propensity to travel is used as a stratification criterion.

The selected persons collaborate three times in alternate months over six months, leave the sample one semester, and are interviewed another three times during the following semester.

**Collection method:** computer-assisted telephone or personal interviews, online questionnaire (since 2018).

For further information, the [methodology](#) and the [standardised methodological report](#) of the survey can be consulted on the INE website.

INE statistics are produced in accordance with the Code of Good Practice for European Statistics, which is the basis for the institution's quality policy and strategy. **For more information see the section on [Quality at INE and the Code of Best Practices](#) on the INE website.**
