#### Review and update of data

On the press release day, INE has updated SSAI data series corresponding to the last five months. In the case of calendar adjusted and seasonally and calendar adjusted series, according to INE standard, series are revised since its beginning. Results are available on INEBase.

### Methodological note

The Services Sector Activity Indicators (SSAI) measure the short-term evolution of the activity of companies belonging to the Non-Financial Market Services sector through two variables: turnover and employed personnel. Turnover comprises the amounts invoiced by the company for provision of services and sale of goods. Employed personnel include both paid and unpaid personnel.

In order to obtain this data, an ongoing survey is conducted, every month researching more than 28,000 companies that operate in this sector. Results are presented as indices so as to measure variations as compared to the base year 2015.

The characteristics of this statistics are:

Type of survey: monthly continuous survey.

#### Base year: 2015.

**Population scope:** companies whose main economic activity is described in sections G, (Trade), H (Transport and Storage), I (Accommodation), J (Information and Communications), M (Professional, Scientific and Technical Activities) and N (Administrative and Support Services Activities) of the National Classification of Economic Activities (CNAE-09).

**Geographical scope:** all the national territory except for Ceuta and Melilla, for which it is only collected in division 47 of CNAE-09 (retail trade).

Sample size: 28,000 companies.

Type of sampling: stratified random sampling.

**Collection method:** completion of the questionnaire by the respondent using one of the following methods: internet (IRIA system), e-mail, fax, telephone or by postal mail.
