22 March 2012

### Industrial Turnover Indices (ITI). Base 2005 Industrial New Orders Received Indices (INORI). Base 2005 January 2012. Provisional data

### Main results

- The annual rate of the **Industrial Turnover Index** stands at **1.6%** in the month of January, five-and-a-half points above the registered in December.

- By economic destination of the goods, Energy and Non-durable consumer goods present positive interannual rates.

- The annual variation rate of **New Orders Received** in the month of January is **0.5%**, four points higher than in December.

### **Evolution of Industrial Turnover**

The Industrial Turnover Index (ITI) experienced an interannual variation of the 1.6% in January, five-and-a-half points above the registered in December.

By economic destination of the goods, the industrial sectors that presented the greatest positive effects on the general index were:

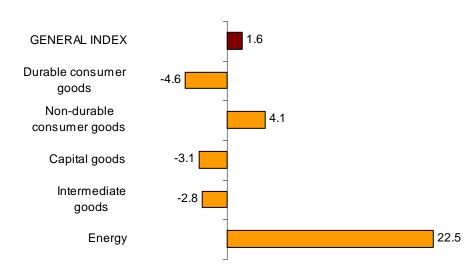

• **Energy**, with an annual variation of 22.5% and an effect of 2.314, mainly due to the increase observed in the *Manufacture of coke and refined petroleum products*.

• Non-durable consumer goods, with an annual rate of 4.1% and an effect of 1.135, mainly caused by the increases observed in the *Food industries (except grain mill products and food for animals)*.

In turn, the industrial sectors that presented the greatest negative effect on the general index were:

• Intermediate goods, with an annual rate of -2.8% and an effect of -1.088, due to the decreases registered in almost all activities comprising this sector. Among them, worth highlighting were *Metallurgy; manufacture of iron, steel and ferro-alloy products* and *Manufacture of other non-metallic products*.

• **Capital goods**, with an annual variation of -3.1% and an effect of -0.651, mainly due to the decrease observed in the *Manufacture of motor vehicles, trailers and semi-trailers*.

## Annual rates of ITI General index and by economic destination of the goods

### Details of the interannual variations

A more detailed analysis showed the activities that had the greatest effect on the annual rate of the ITI for the month of January.

#### Activities with the greatest positive effect on the annual rate of the general index of the ITI

### Evolution of the ITI, adjusted for the calendar effect

After eliminating the calendar effect, that is, the difference between the number of working days in a given month in different years, the interannual variation of the ITI in the month of January was -1.1%, more than two points lower than that registered in December.

#### **Evolution of Industrial New Orders Received**

Press

Dolean

The Industrial New Orders Received Index (INORI) experienced an interannual variation of 0.5% in January, four points above that registered in December.

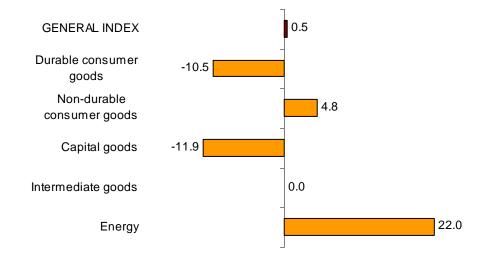

By economic destination of the goods, the industrial sectors that presented the greatest positive effects on the general index were:

• **Energy**, with an annual variation of 22.0% and an effect of 2.132 on the general index, mainly due to the increase registered in the *Manufacture of coke and refined petroleum products*.

• **Non-durable consumer goods,** with an annual rate of 4.8% and an effect of 1.298, mainly caused by the increases observed in the *Food industries (except grain mill products and food for animals)* and in the *Graphic arts and reproduction of recorded media*.

In turn, **Capital goods** was the industrial sector that presented a negative effect on the general index, with an annual variation of -11.9% and an effect of -2.678 on the general index, motivated by the decrease observed in the *Manufacture of motor vehicles, trailers and semi-trailers*.

#### Annual rates of INORI General index and by economic destination of the goods

#### Details of the interannual variations

A more detailed analysis showed the activities that most affected the annual rate of the INORI in the month of January.

	Annual	Effect	
Activity (Basic aggregate of the INORI)	rate (%)		
Manufacture of coke and refined petroleum products	21.5		2.066
Manufacture of electrical material and equipment except household appliances	48.2		1.371
Food industries (except grain mill products and food for animals)	6.8		0.923
Graphic arts and reproduction of recorded media	20.0		0.426

Manufacture of motor vehicles, trailers and semi-trailers	-17.0	-2.248
Chemical industry except cleaning articles, perfumes and cosmetics	-6.5	-0.458
Metallurgy; manufacture of iron, steel and ferro-alloy products	-4.9	-0.341
Manufacture of other non-metallic ore products	-9.0	-0.338

#### Activities with the greatest negative effect on the annual rate of the general index of the INORI

### Evolution of the INORI, adjusted for the calendar effect

After eliminating the calendar effect, that is, the difference between the number of working days in a given month in different years, the interannual variation of the INORI in the month of January was -1.8%, more than two-and-a-half points lower than that registered in December.
