30 August 2023

# Export (IPRIX) and Import (IPRIM) Price Indices of Industrial Products. Base 2015

July 2023. Provisional data

# The annual rate of the IPRIX stands at -2.7%, one tenth lower than the June figures

# The annual variation of the IPRIM is -8.7%, one and a half points lower than the previous month

### Annual evolution of export prices

The annual rate for the Export Price Index (IPRIX) in July was -2.7%, one tenth below that recorded in June.

Among the industrial sectors with a negative influence on the evolution of the annual rate of the IPRIX by economic destination of the goods, worth noting are:

- **Capital goods**, whose rate decreased by more than one point and stands at 3.6%, due to the decrease in prices in the *Manufacture of motor vehicles*, compared to the increase from July of last year.
- **Non-durable consumer goods**, with an annual rate of 4.7%, one and a half points below that of June. This evolution is due to the decrease in the prices of the *Processing and preservation of meat and production of meat products*, which increased in the same month of 2022.

On the other hand, the industrial sectors with a positive influence were:

- **Energy**, whose annual rate was -40.5%, more than three points higher than that of the previous month, due to the increase in the prices of *Oil refining*, which decreased in July of last year.
- Intermediate goods, whose rate increased by half a point and stands at -4.5%, due to the prices of *Manufacture of basic precious and other non-ferrous metals* and, to a lesser extent, of *Manufacture of basic iron and steel and of ferro-alloys* decreasing less than in the same month of the previous year.

#### Contribution of industrial sectors to the annual IPRIX rate

The annual variation of the general index excluding Energy decreased by five tenths, to 0.5%, standing more than three points higher than the general IPRIX.

#### Annual evolution of the IPRIX

General index and general index without Energy. Percentage

## Monthly evolution of export prices

In July, industrial export prices recorded a monthly rate of -0.5%, as compared to the month of June.

### Monthly evolution of the IPRIX

General index. Percentage

By economic destination of the goods, among the industrial sectors that have a negative monthly effect on the general index, worth noting are:

- **Intermediate goods**, with a monthly variation of -0.9% and a contribution of -0.320, due to decreases in the prices of the *Manufacture of basic iron and steel and of ferro-alloys* and the *Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms*.
- Capital goods, with a variation rate of -0.6%, due to the decrease in prices of the *Manufacture of motor vehicles*. This sector's contribution to the overall index was -0.223.

On the other hand, worth noting amongst the sectors with a positive monthly effect was:

• **Energy,** which presented a monthly rate of 1.4% and a contribution of 0,073, due to the increase in the prices *of Oil refining*.

A more detailed analysis shows the activities that most affected the monthly IPRIX rate in the month of July.

Activities with the greatest positive contribution to the monthly rate of the IPRIX

| Activity (CNAE 2009 groups)                       | Monthly rate (%) | Contribution |
|---|------------------|--------------|
| Manufacture of refined petroleum products         | 3.7              | 0.113        |
| Manufacture of vegetable and animal oils and fats | 2.1              | 0.044        |
| Manufacture of rubber products                    | 1.0              | 0.017        |

Activities with the greatest negative contribution to the monthly rate of the IPRIX

| Activity (CNAE 2009 groups)                                       | Monthly rate (%) | Contribution |
|---|------------------|--------------|
| Manufacture of motor vehicles                                     | -1.0             | -0.179       |
| Manufacture of basic iron and steel and of ferro-alloys           | -2.3             | -0.090       |
| Manufacture of basic chemicals, fertilisers and nitrogen          |                  |              |
| compounds, plastics and synthetic rubber in primary forms         | -1.2             | -0.069       |
| Manufacture of basic precious and other non-ferrous metals        | -1.2             | -0.049       |
| Manufacture of pulp, paper and paperboard                         | -2.6             | -0.037       |
| Electric power generation, transmission and distribution          | -1.5             | -0.030       |
| Printing and service activities related to printing               | -5.2             | -0.023       |
| Manufacture of other chemical products                            | -2.1             | -0.023       |
| Processing and preserving of meat and production of meat products | -0.8             | -0.022       |
| Manufacture of pharmaceutical preparations                        | -0.7             | -0.017       |

## Annual evolution of industrial prices, combining domestic and foreign markets

The Industrial Price Index of the domestic and foreign markets, which is obtained through aggregating the IPRI and the IPRIX, decreased in its annual rate by three tenths in July, to -6.4%.

In turn, the annual variation rate of the general index, excluding Energy, fell by four tenths, to 1.3%, standing more than seven and a half points above the general IPRIM+IPRIX rate.

#### Annual evolution of the IPRI+IPRIX

General index and general index without Energy. Percentage

## Annual evolution of import prices

The Import Price Index (IPRIM) recorded an annual rate of -8.7% in July, one and a half points below the June figures.

By economic destination, all industrial sectors had a negative influence on the variation of the annual IPRIM rate. Among them are:

• **Energy,** whose variation fell more than two points, to stand at -37.0%. Notable in this behaviour was the increase in prices for *Extraction of crude petroleum and natural gas,* which was lower this month compared to July of 2022.

On the other hand, it is worth highlighting the increase in the prices of *Manufacture of coke* and refined petroleum products, which decreased in the same month of last year.

- **Intermediate goods**, which presents a variation of -4.5%, more than a point below that of June, due to a decrease in the prices in the *Chemical industry*, compared to the increase of July of last year.
- **Non-durable consumer goods**, whose variation decreased by nearly one and a half points and stands at -0.6%, due to the prices of the *Food industry* increasing less this month compared to the same month of 2022.

#### Contribution of industrial sectors to the annual IPRIM rate

Annual General IPRIM rate difference 1.5

The annual variation rate of the overall index excluding Energy decreased nearly one point, to -0.5%, standing nearly eight points above the overall IPRIM.

#### **Annual evolution of the IPRIM**

General index and general index without Energy. Percentage

# Monthly evolution of import prices

In July, the monthly variation of the Import Price Index was 0.0%.

#### Monthly evolution of the IPRIM

General index. Percentage

By economic destination of the goods, among the industrial sectors that had a negative monthly effect on the general IPRIM, worth noting are:

- **Intermediate goods**, with a rate of -1.0%. The contribution of -0.293 is a result of the decrease in the prices of the *Manufacture of basic metals; Manufacture of basic iron, steel and ferro-alloy products* and the *Chemical industry*
- Capital goods, which presented a rate of -0.1% and a contribution of -0.025, due to a decrease in the prices of the *Manufacture of computer, electronic and optical products*.

On the other hand, worth noting amongst the industrial sectors with a positive monthly effect were:

• **Energy**, which presents rate of 2.0%, due to the increase in the prices of *Manufacture of coke and refined petroleum products* and, to a lesser degree, the *Extraction of crude petroleum and natural gas*. This sector's contribution to the overall IPRIM was 0.299.

A more detailed analysis shows the activities that most affected the monthly IPRIM rate in the month of July.

Activities with the greatest positive contribution to the monthly rate of the IPRIM

| Activity (CNAE 2009 divisions)                     | Monthly rate (%) | Contribution |
|--|------------------|--------------|
| Manufacture of coke and refined petroleum products | 6.5              | 0.237        |
| Extraction of crude petroleum and natural gas      | 1.0              | 0.107        |
| Manufacture of wearing apparel                     | 0.4              | 0.023        |

Activities with the greatest negative contribution to the monthly rate of the IPRIM

| Activity (CNAE 2009 divisions)                           | Monthly rate (%) | Contribution |
|--|------------------|--------------|
| Manufacture of basic metals                              | -1.8             | -0.087       |
| Manufacture of chemicals and chemical products           | -0.8             | -0.080       |
| Mining of metal ores                                     | -2.5             | -0.037       |
| Mining of coal and lignite                               | -10.3            | -0.034       |
| Manufacture of computer, electronic and optical products | -0.4             | -0.026       |
| Manufacture of rubber and plastic products               | -0.8             | -0.024       |
| Manufacture of paper and paper products                  | -1.6             | -0.024       |

#### Data reviews and updates

Coinciding with today's publication, the INE has updated the data of the IPRIX and IPRIM series corresponding to the last three months, becoming final in the month of April 2023. The results are available at INEBase.

# Methodological note

The Export Price Index (IPRIX) is a short-term indicator that measures the monthly evolution of the prices of industrial products manufactured in the domestic market and sold in the foreign market.

On the other hand, the Import Price Index (IPRIM) is a short-term indicator that measures the monthly evolution of the prices of industrial products from the rest of the world.

In order to obtain them, a continuous monthly survey is conducted, which every month investigates industrial establishments that carry out operations in the foreign market.

**Type of survey**: monthly continuous survey.

Base year: 2015.

Reference period of the weightings: the year preceding the current year.

Population scope: industrial workplaces.

Sample size: 3,800 industrial establishments for the IPRIX and 4,700 for the IPRIM.

**Number of observations:** In the IPRIX approximately 14,000 monthly prices of 1,700 products and in the IPRIM approximately 18,000 prices of 2,100 products.

General calculation method: Laspeyres' Chain Index.

Collection method: internet (IRIA system), e-mail, fax, telephone or postal mail.
