* Due to the update made in the directory of rural tourism accommodation in Canarias, the data published as of June 2009 (for Canarias and the national total) cannot be directly compared to those published last year. To bridge this gap in the series, link coefficients have been created to allow users to compare data from different years. The coefficients will be published monthly on the INE website in the section dedicated to this statistical operation, in a specific section entitled link coefficients.

¹ Information provided about the total number of travellers and overnight stays in the whole month.

² Due to the updating in the directory of establishments carried out in the Canary Islands, the data to be published until June 2010 (for Las Palmas, Tenerife, Canary Islands and the national total) are not directly comparable with the data published last year, therefore, data link coefficients have been calculated to allow the comparison of data between different years. These coefficients are available in INE website (www.ine.es)

⁴ To facilitate the comparability between data from different Autonomous Communities (and because of the different regulation and different characteristics), a group called rural house has been created, with those accommodations with similar typology (location, capacity, etc...).

The variables included in the previous table have been estimated with that type of establishments.

The variables shown in the table have been estimated with the type of accommodation under rural tourist accommodation.
