The island of Tenerife registered over 1.8 million overnight stays in February.

The tourist sites with the highest number of overnight stays were Madrid, Barcelona and San Bartolomé de Tirajana. Arona had the highest occupancy rate by bedplaces (80.4%) and Sallent de Gállego had the highest weekend occupancy rate (88.2%).

The four communities (Canarias, Andalucía, Comunidad de Madrid and Cataluña) which accounted for 69.6% of the total weight of the Hotel Price Index in the month of February, recorded positive interannual rates, with the exception of Andalucía.

Canarias, which carried the largest load in the weight structure this month (23.4%), showed an interannual rate of 1.6%, that is, 0.3 points higher than the rate estimated in January. Hotel prices experienced a 1% decrease in Andalucía, as compared with the -1.1% registered the previous month. In Comunidad de Madrid, the interannual rate was 2.2%, representing 0.3 points lower than in January. Cataluña presented an interannual rate of 1.5%, 0.8 points higher than the previous month.

In the analysis of the five most important Communities in this indicator, during the month of February, the interannual increases of hotel income were worth noting in Comunidad de Madrid (2.5%), Cataluña (2.1%), Comunitat Valenciana (1.6%) and Canarias (1.3%). In Andalucía, on the other hand, the rate was -0,4%.

Methodological note 2008

Hotel Price Index - Hotel Income Index

As of the year 2000, the INE publishes the Hotel Price Index (HPI) and the Hotel Income Index (HII), compiled with the information that hotel businesspersons include in a specific section of the Hotel Occupancy Survey questionnaire.

This part of the questionnaire has not been modified since it was incorporated in said year 2000. Nevertheless, the changes that have taken place in the sector over these past eight years have encouraged the introduction of certain modifications in the said section of the questionnaire. With these changes, we hope, on the one hand, **to collect the new distribution channels favoured by generalised Internet use**, and on the other hand, **to adapt the questionnaire to the terms and concepts that are most frequently used within the sector**, as well as the data available in the business management systems themselves.

This improvement will make it possible, **beginning in the year 2009, for the INE to disseminate the whole of the new variables demanded by the sector, these variables being considered ideal for measuring profitability**: the ADR (Average Daily Rate) and the RevPar (Average income per available room).

Throughout the year 2008, the HPI and the HII will continue to be disseminated, on a national level and by Autonomous Community. However, due to the aforementioned updating of the questionnaires, we will not provide the information on prices and income broken down by tariff and by establishment category, granted that in the current format, information is collected referring to the type of client rather than to the tariffs applied. Thus, for example, the "weekend" and "normal" tariffs will disappear, to form a joint "individuals" grouping; conversely, in the 2008 questionnaire, information will be collected on the different types of commercialisation, such as "direct online hiring", which was not previously requested.

Beginning in the year 2009, linked series will be offered on the different establishment categories, once sufficient information is available referring to the whole of the year 2008, allowing us to carry out said links with the utmost quality required.
