Revision and updating of data

Coinciding with today's publication, the INE has updated the data corresponding to March 2022 in the Hotel Occupancy Survey (HOS), the Hotel Price Index (HPI) and the Indicators on the Profitability of the Hotel Sector (IPHS).

Methodological note

The main objective of the Hotel Occupancy Survey (HOS) is to ascertain the behaviour of a series of variables that make it possible to describe the fundamental characteristics of the hotel sector, from the viewpoint of both supply and demand, thus meeting the needs of national institutions and the requirements of international organisations for knowledge regarding the sector.

The Hotel Price Index (HPI) is a statistical measure of the monthly evolution of prices applied to clients by hotel entrepreneurs.

The main objective of the Indicators of Profitability of the Hotel Sector (IRSH) is to facilitate decision-making in the hotel sector. These are the *Average Daily Rate* (ADR), which collects the average daily income per occupied room; and the *Revenue per Available Room* (RevPAR), which collects the average daily revenue per available room.

Type of operation: monthly continuous survey.

Population scope: all hotel establishments.

Geographical scope: the entire national territory.

Reference period of the results: the month.

Reference period of the information: seven consecutive days of each month, chosen randomly in such way that, between all the establishments, the entire month is covered.

Sample design: stratified sampling by province and establishment category, with 4 and 5 gold star categories being exhaustive.

Sample size: approximately 9,250 establishments in winter and 11,200 in summer.

Collection method: questionnaire filled in directly by the hotel establishment.

For more information on these statistical operations, you can consult the <u>methodology and the</u> <u>standardised methodological report</u> for each operation in INEbase.

INE statistics are produced in accordance with the Code of Good Practice for European Statistics, which is the basis for the institution's quality policy and strategy. For more information see the section on <u>Quality at INE and the Code of Best Practices</u> on the INE webpage.
