

24 June 2008

Hotel Tourism Short-Term Trends (HOS/HPI/HII)
May 2008. Provisional data

Overnight stays in hotel establishments increase 6.6% in May as compared with the same month in 2007

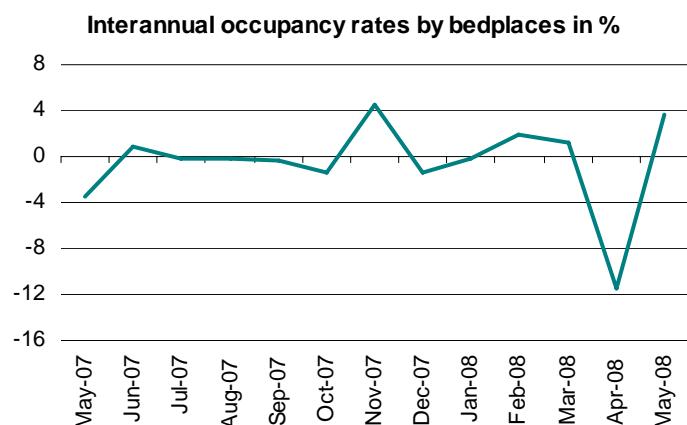

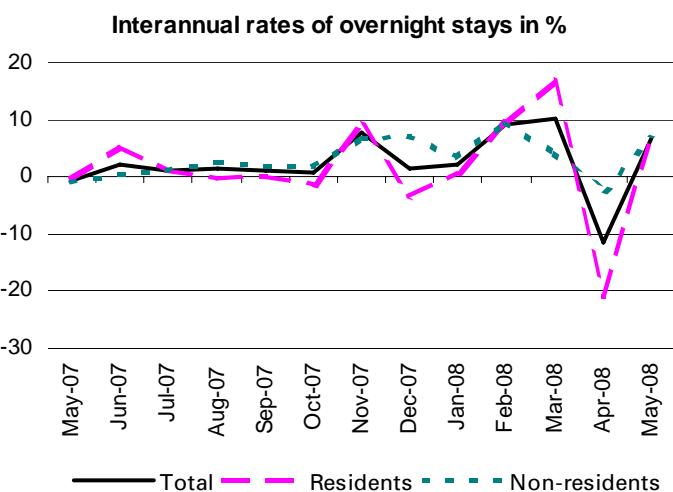

The interannual rate of hotel prices increases 1.3%

During the month of May, more than 25 million overnight stays were registered in hotel establishments, indicating an increase of 6.6% as compared with the same month in 2007. The increase in overnight stays was recorded both for residents, whose interannual rate stood at 7.1%, and for non-residents, who presented a variation of 6.3%.

The average stay grew 0.6%, in interannual terms, standing at 3.1 nights per guest.

On the other hand, the **Hotel Price Index (HPI)** registered a growth of 1.3% in the month of May, practically one-and-a-half points lower than that recorded the same month in 2007.

During the month of May, 52.9% of the available bedplaces were filled, 3.7% more than the same month of the previous year. The weekend occupancy rate by bedplaces stood at 60.1%, with an interannual increase of 5.2%.

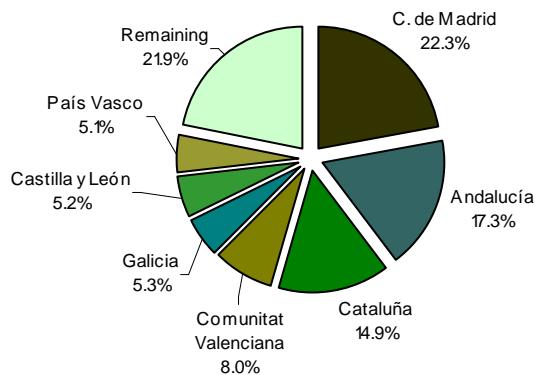

Overnight stays of German and British citizens increase

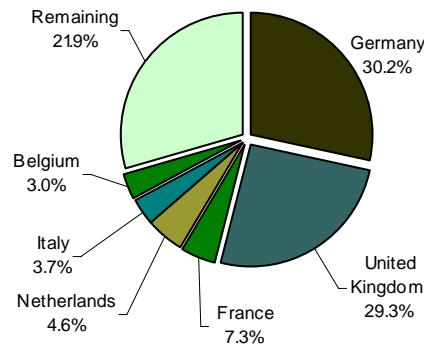

Guests from Germany and the United Kingdom made 9.3 million overnight stays in May, accounting for 59.5% of the total for non-residents. Both the German and the British markets experienced interannual increases in overnight stays, of 9.5% and 0.5%, respectively.

Overnight stays of guests from France, the Netherlands and Italy (the following markets) registered interannual rates of 10.6%, 10.4% and 4.5%, respectively.

Overnight stays of Spanish guests by Autonomous Community of origin in %

Overnight stays of foreign guests by country of origin in %

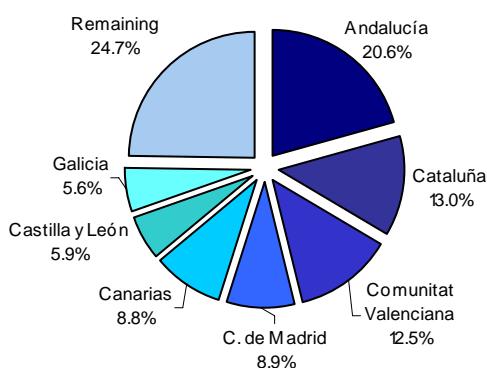

Illes Balears is the preferred destination for foreign guests

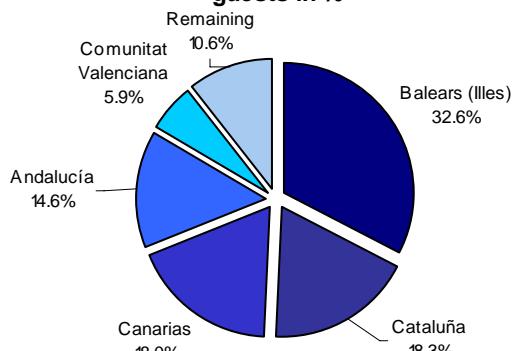

The main destination chosen by non-residents was Illes Balears, the Autonomous Community in which overnight stays by foreign nationals, representing 32.6% of the national total, increased 6.1% as compared with May 2007. It was followed by Cataluña, with an interannual rate of 2.4%, and Canarias, with a rate of 9.0%.

Andalucía, Cataluña and Comunitat Valenciana were the preferred destinations of Spaniards, with interannual rates of overnight stays of 10.7%, 3.1%, and -8.9%, respectively.

Distribution of overnight stays of Spanish guests in %

Distribution of overnight stays of foreign guests in %

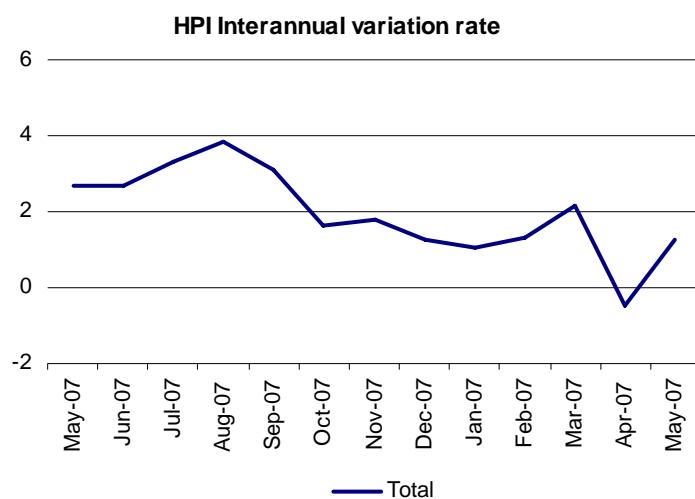

During the month of May, Illes Balears was the Autonomous Community with the highest occupancy rate by bedplaces (60.8%), ahead of Canarias (59.1%) and Comunidad de Madrid (57.3%).

The **tourist areas** with the highest occupancy and overnight stay rates were located on the islands and the coasts. The coast of Barcelona obtained the highest occupancy rate both by bedplaces (68.6%), and by bedplaces at weekends (79.3%). The island of Mallorca registered the highest number of overnight stays in May, more than 4.4 million.

The tourist sites with the highest number of overnight stays were Madrid, Barcelona and Calvià. In turn, Benidorm reached the highest occupancy rate by bedplaces (79.3%) and the highest weekend occupancy rate (86.7%), the latter being the same percentage as for Córdoba.

Hotel prices record an interannual rate of 1.3% in May

The interannual increase in the HPI stood at 1.3% in May, 1.8 points higher than the rate from the previous month, and 1.4 points below the rate registered one year ago.

Uneven performance of prices in the Autonomous Communities

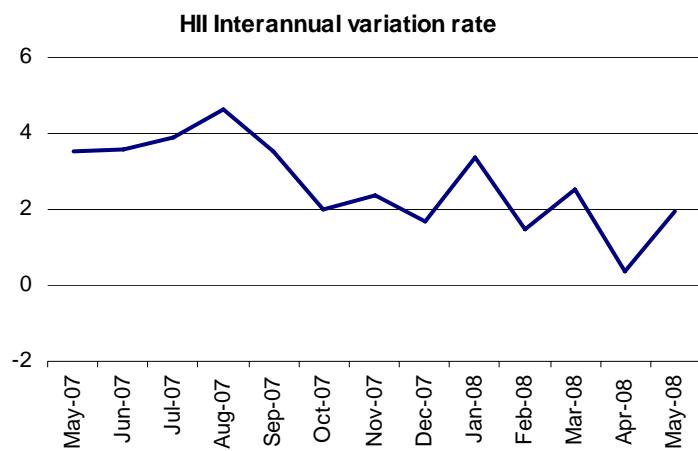

The four Communities (Cataluña, Andalucía, Illes Balears, and Canarias) which accounted for 64.5% of the total weight of the Hotel Price Index in the month of May, recorded different interannual evolution.

Thus, Cataluña, which maintained the greatest load in the weight structure this month (18.3%), showed an interannual rate of 2.2%, that is, one point higher than the rate estimated in April. In Andalucía, hotel prices experienced a 1.3% decrease, as compared with the -2.6% recorded the previous month. Conversely, Illes Balears recorded an interannual rate of 3.2%, that is, 1.9 points higher than the previous month. In Canarias, the interannual rate was 1.5%, that is, 3.2 points higher than in April.

The HII experiences an interannual increase of 2.0%

The Hotel Income Index (HII), which unlike the HPI also considers the variation in the rate structure, reflected an interannual rate of income per occupied room of 2.0% in May, one-and-a-half points lower than the rate recorded one year ago.

The five most important Communities in this index in May showed uneven behaviour in hotel income as compared with May 2007: Illes Balears (3.8%), Cataluña (2.7%), Andalucía (-0.4%), and Canarias (0.9%).

Methodological note 2008

Hotel Price Index - Hotel Income Index

As of the year 2000, the INE publishes the Hotel Price Index (HPI) and the Hotel Income Index (HII), compiled with the information that hotel businesspersons include in a specific section of the Hotel Occupancy Survey questionnaire.

This part of the questionnaire has not been modified since it was incorporated in said year 2000. Nevertheless, the changes that have taken place in the sector over these past eight years have encouraged the introduction of certain modifications in the said section of the questionnaire. With these changes, we hope, on the one hand, **to collect the new distribution channels favoured by generalised Internet use**, and on the other hand, **to adapt the questionnaire to the terms and concepts that are most frequently used within the sector**, as well as the data available in the business management systems themselves.

This improvement will make it possible, **beginning in the year 2009, for the INE to disseminate the whole of the new variables required by the sector, these variables being considered ideal for measuring profitability**: the ADR (Average Daily Rate) and the RevPar (Average income per available room).

Throughout the year 2008, the HPI and the HII will continue to be disseminated, on a national level and by Autonomous Community. However, due to the aforementioned updating of the questionnaires, we will not provide the information on prices and income broken down by rate and by establishment category, granted that in the current format, information is collected referring to the type of client rather than to the rates applied. Thus, for example, the "weekend" and "normal" rates will disappear, to form a joint "individuals" grouping; conversely, in the 2008 questionnaire, information will be collected on the different types of commercialisation, such as "direct online hiring", which was not previously requested.

Beginning in the year 2009, linked series will be offered on the different establishment categories, once sufficient information is available referring to the whole of the year 2008, allowing us to carry out said links with the utmost quality required.
