Deceased from cancer in Spain

In 2021, Cancer was the second cause of death
After diseases of the circulatory system
(24.5% of all deaths)

Deaths more frequent for cancer
() Variations with respect to 2020

Cancer deaths
0.7% less than 2020

Standardised death rate of cancer
(Per 100,000 inhabitants)

% of total deaths from cancer

(Per 100,000 inhabitants)

Cancer is the first cause of death in men

Deaths caused by tumors in UE-27 (Millions)

Note: The standardised death rate (SDR) represents the death rate of a region (autonomous communities, countries...) if all of them had the same composition by age.

For the calculation, the tumor data has been taken, which may include non-malignant neoplasms.
