

**Advance estimate of the Quarterly National Accounts - Base 2000.**  
Second Quarter 2008

**The interannual growth rate of the Gross Domestic Product  
increases 1.8% in the second quarter of 2008**

According to the quarterly GDP advance estimate, during the second quarter of 2008, the Gross Domestic Product (GDP)<sup>1</sup> generated by the Spanish economy registered a real growth rate of 1.8%, as compared to the same period of the previous year<sup>2</sup>, thus continuing the slow-down trend which began one year ago.

In this way, the Spanish economy slowed its rate of progress by nine tenths, as a result of a slow-down in national demand, partially compensated by the foreign sector, which presented a positive contribution to aggregate growth this quarter.

Moreover, the **quarter-on-quarter GDP growth rate stood at 0.1%**, two tenths less than in the previous quarter.

**Gross Domestic Product**

**Gross Domestic Product**

Rates	2006				2007				2008	
	Q. I	Q. II	Q. III	Q. IV	Q. I	Q. II	Q. III	Q. IV	Q. I	Q. II
Interannual	3.7	3.8	3.9	4.0	4.1	4.0	3.8	3.5	2.7	1.8
Quarter-on-quarter	1.0	1.1	0.9	1.1	1.0	0.9	0.7	0.8	0.3	0.1

<sup>1</sup>Chain-linked volume measures.

<sup>2</sup> Data adjusted for seasonal and calendar effects.

### **Methodological note**

The quarterly GDP advance estimate uses the same methodology as that used when compiling the complete estimate, although in a simplified framework. Additionally, advanced time series modelling techniques are used, both to complete the data of the reference period and to validate estimates.

Based on the quarterly GDP estimate in seasonal and calendar adjusted terms of some countries of the European Union (EU), including Spain, the Statistical Office of the European Communities (Eurostat) computes a first GDP growth estimate for the EU and the Economic and Monetary Union. The calculation of this advance estimate is part of the Eurostat and Central European Bank policy of offering data comparable, in terms of time and quality, to the data produced in the United States.

The quarterly GDP advance estimate provides exclusively guidance information, and therefore could differ from the data provided by the Quarterly Spanish National Accounts, published a few days later.

In this regard, by 27 August, the INE will have published the complete tables and charts of the Quarterly Spanish National Accounts, corresponding to the second quarter of 2008.
