

16 December 2020

Employment of Persons with Disabilities (EPD)¹ Year 2019

Main results

- 34.0% of persons with an officially recognised disability were active, 0.5 percentage points lower than in 2018. This rate of activity was 43.7 percentage points lower than of the population without a disability.
- The unemployment rate for this group of persons was 23.9%, falling 1.3 points compared to 2018. This rate was 10 percentage points higher than the population without a disability.
- The employment rate of persons with a disability was 25.9% (66.9% for persons without a disability) an increase of 0.1 percentage points compared to 2018. 89.5% of those employed were salaried employees and, of these, 73.1% had an indefinite contract.

Characteristics of the active population with disabilities

In 2019, there was a total of 1,876,900 working age (from 16 to 64 years) persons with certified disabilities, accounting for 6.2% of the total working age population.

Of this figure, 638,600 were active. Within the active population with disabilities, a greater percentage of men, most notably in the 45 to 64 age group there was less representation of highly educated persons than in the active population without disability were noted.

¹ These are persons with a degree of disability greater than or equal to 33% and who have been assimilated (according to Royal Legislative Decree 1/2013).

For the employed population with disabilities (485,900 persons in 2019), the same differences regarding sex, age and education level were noted for those who were active in comparison with employed persons without a disability.

The distribution by seniority in the company was similar in both groups.

The percentage of employees with disabilities in companies with 50 or more employees in the private sector was 2.2%. This figure includes entities specialised in the social inclusion of persons with disabilities.

Percentage of wage earners with disabilities with regard to the total wage earners who make Social Security contributions in ordinary companies in the private sector^(*). Year 2019

Units: percentage

	Percentage
Total of wage earners	1.9
Companies with less than 50 employees	1.6
Companies with 50 or more employees	2.2

(*) In case of public sector, the quota for persons with disabilities is established on the recruitment process and not with respect to the staff.

The word "ordinary" is used as opposed to "protected" (work in "special employment centers").

Regarding unemployment, the population with disabilities had a higher percentage of men, of persons aged between 45 and 64, and of unemployed persons with primary and secondary education compared to unemployed persons without disabilities. On the other hand, there were fewer unemployed persons with higher education and aged between 16 and 24.

Activity, employment and unemployment rates

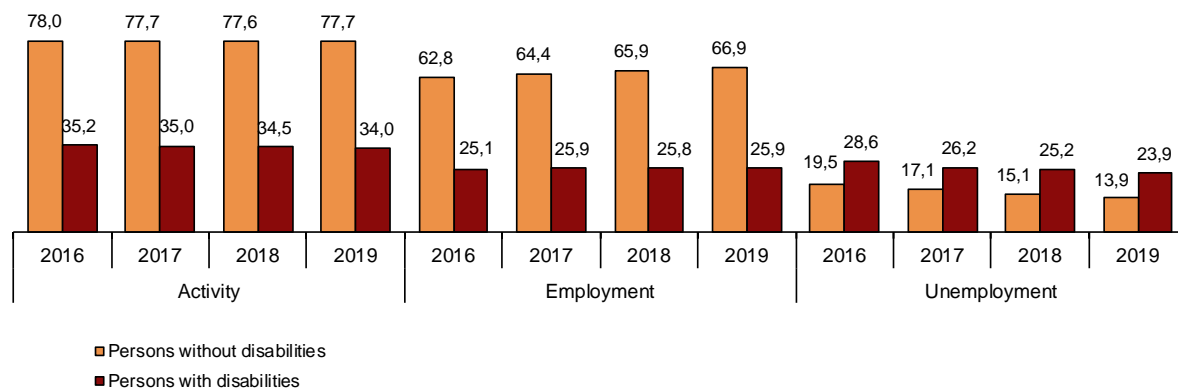

The most notable detail regarding the group of persons with disabilities is their low rate of participation in the labour market. In 2019, the activity rate fell by half a point and stood at 34.0%, more than 43 points lower than that of the population without disabilities.

The employment rate was 25.9%, 41 percentage points lower than that of persons without disabilities. This rate grew by 0.1 points compared to 2018.

In turn, the unemployment rate was 10 points higher than that of the population without disabilities (23.9% as against 13.9%). Compared with 2018, the unemployment rate fell by 1.3 points (1.2 in the case of non-disabled persons).

Evolution of activity, employment and unemployment rates. Year 2019

Units: percentage

Disability and the labour market according to sex

As with the general population, women with disabilities have a less active presence in the labour market. Nonetheless, their activity rate was closer to the male rate than in the population without disabilities (33.3% compared to 34.6%).

The employment rate of men with disabilities was 1.4 percentage points higher than the rate for women. For the rest of the population between the ages of 16 and 64, the difference was 12.4 percentage points.

On the other hand, the unemployment rate for women with disabilities was higher than the rate for men by 1.2 percentage points. For women without disabilities this was higher by 3.7 percentage points.

Activity, employment and unemployment rates by sex. Year 2019

Units: percentage

The employment rate of men with disabilities rose by 0.3 points compared to 2018, whereas the rate for women fell by 0,1 points. The unemployment rate fell by 2.0 and 0.4 points, respectively.

Disability and the labour market according to age

In 2019, there was a higher rate of unemployment in the younger population. The highest activity rates were in the 25 to 44 year old age group, both for persons with disabilities and for the rest of the population.

In turn, the biggest decreases in unemployment rates were in the 16 to 24 year old age group, both for the population with disabilities (a decrease of 1.7 points compared to 2018) and in the rest of the population (a decrease of 1.8 points).

Disability and the labour market according to type of disability

Participation in the labour market is heavily determined by the type and intensity of the disability. The activity rate for the less intense degrees of disability was 54.0% in 2019 and progressively decreased to 12.7% for the highest degree of disability.

Activity rates by degree of disability

Units: percentage

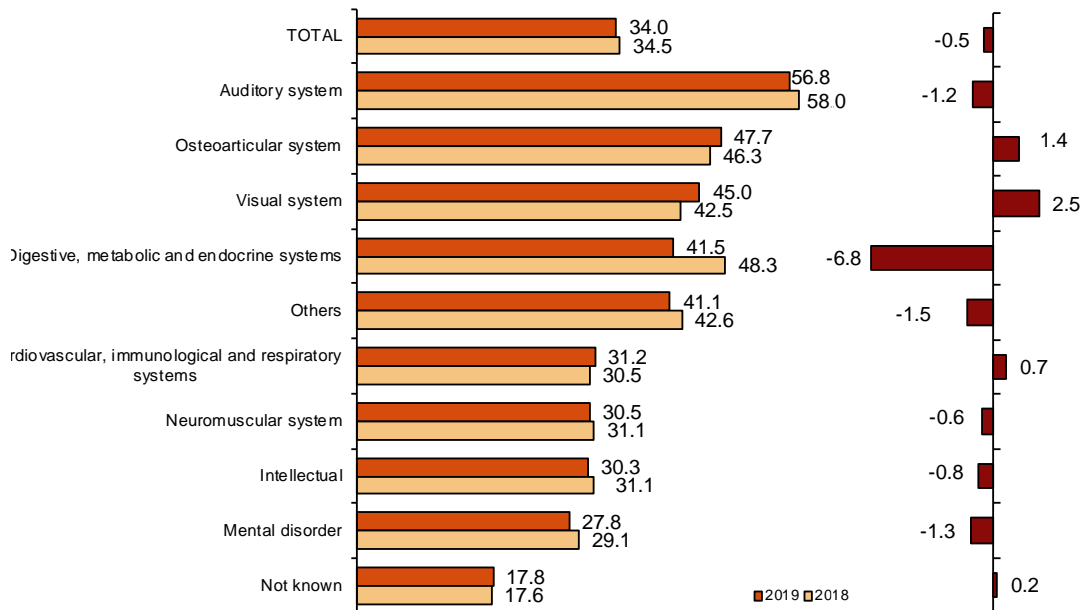

(*) The group 'Not known' consists of pensioners who have a recognised permanent disability pension and are not registered in the SDPD.

Persons with hearing impairments had the highest activity rates (56.8%) and those with mental illnesses had the lowest (27.8%).

The largest increases in activity rates in 2019 compared to the previous year occurred in the groups associated with the *Vision system* and the *Osteoarticular System*. In contrast, the biggest decreases occurred in groups with disabilities linked to the *A Digestive, metabolic and endocrine system* and *Others*.

Activity rates according to type of disability

Units: percentage

(*)The group "Others" includes persons with expressive language disorders, indeterminate or unknown disabilities and also Social Security affiliates for whom the type of disabilities is not available.

The group 'Not known' consists of pensioners who have a recognised permanent disability pension and are not registered in the SDPD.

Labour characteristics and disability

The majority of workers with disabilities in 2019 were salaried, had indefinite contracts, worked full-time, and worked in the *Service* sector.

Thus, 89.5% of persons with disabilities who worked did so as salaried employees (4.9 percentage points higher than persons without disabilities). And 73.1% of those who worked for others had a permanent contract (0.7 points less than the population without disabilities).

A total of 82.7% of employed persons with disabilities worked full-time, a lower proportion than workers without disabilities (2.9 points less).

80.9% of those employed with disabilities worked in the *Service* sector, compared to 75.4% of those without disabilities.

Distribution according to employment characteristics Year 2019

Units: percentage

Measures that encourage participation in the ordinary labour market²

Among the policies intended to promote this group’s participation in the labour market are those that favour their entry into ordinary employment. Amongst these it is worth highlighting reductions and bonuses in contribution amounts, both for salaried and self-employed workers, as well as the specific hiring of workers with disabilities in the case of salaried workers, which, as well as issuing bonuses in Social Security contribution amounts, provides for certain subsidies.

26.7% of employed persons with disabilities that paid contributions to Social Security in 2019 had some kind of reduction or bonus in contributions.

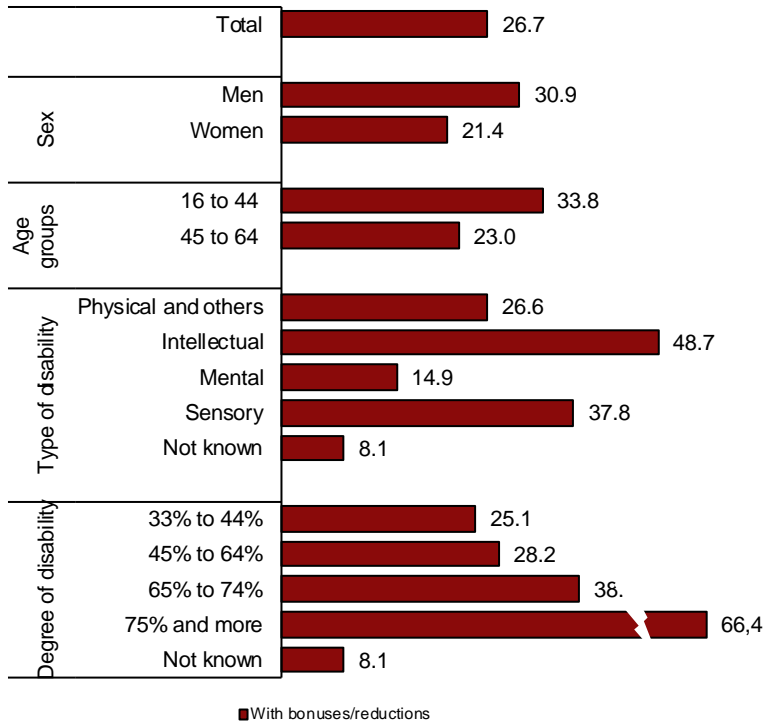

The percentage of salaried workers with disabilities with specific disability contracts was 26.6%.

The reductions and bonuses in contribution quotas and the specific hiring benefited, above all, the male population, the 16-44 year age group, groups with disabilities linked to sensory impairments and intellectual disabilities, and persons with a degree of disability higher than 65%.

²The word ‘ordinary’ is used in contrast to ‘protected’ (work in special employment programmes).

Protection of disability and activity

Public Social Benefits are pensions and subsidies paid from public resources whose purpose is to cover situations of disability, retirement, death and survival, family protection, unemployment for persons over 52 and other statutory improvements and complementary benefits. Therefore, they are an important tool for the disabled population.

Of every 100 persons of working age, 12 received benefits in 2019. In the specific case of persons with disabilities, the Public Benefit System helped 1,277,600 persons. Of them, 260,300 persons were active.

Persons with disabilities according to whether or not they receive benefits. Year 2019

Units: absolute values in thousands

	Absolute values	Percentages
TOTAL	1,876.9	100.0
With Benefits	1,277.6	68.1
Without Benefits	599.3	31.9

Among persons with disabilities receiving benefits, 81.2% received benefits due to a work-related disability. On the other hand, 2.7% did so exclusively in non-contributory terms, that is, without having previously contributed to them.

Persons with disabilities who receive benefits. Year 2019

Inactive persons	1,017.3	79.6

Another protective measure for groups of persons with disabilities is the recognition of the Situation of Dependency, after the approval of *Law 39/2006 of December 14, Promotion of Personal Autonomy and Care for people in situations of dependency*.

In 2019 16.5% of persons with disabilities (309,400) were also officially recognised as being in situations of dependency. Of these, 10.3% remained active in the workforce.

Disability and activity by Autonomous Communities and Cities

The highest activity rates within the group of people with disabilities in 2019 were in Castilla-La Mancha (40.0%), Aragón (40.0%) and in the autonomous cities of Ceuta and Melilla (46.3%).

On the other hand, the lowest activity rates were recorded in Canarias (25.8%), Galicia (29.7%) and Andalucía (30.2%).

(*) The sample size is small and therefore the figure should be treated with caution.

Revision and updating of data

The data published today are final. All results are available on INEBase.

Methodological note

The Employment of Persons with Disabilities (EPD) investigates the situation regarding the labour market of the group of officially recognized persons with disabilities who have a degree of disability greater than or equal to 33%. It focuses on persons of working age, that is, with ages between 16 and 64 years.

By virtue of Royal Legislative Decree 1/2013, which approved the Consolidated Text of the “General Law on rights for persons with disabilities and their social inclusion”, social security pensioners who also have a recognized disability pension to the degree of total, long-term or severe disability will be considered as having a degree of disability greater than or equal to 33%, and state pensioners who have a retirement pension or retirement due to permanent incapacity or unfitness for work. As a result of this Royal Decree, since 2015 the population scope of EPD has included the aforementioned group.

The EPD is created from information provided by IMSERSO and Social Security -which the INE would like to thank for their collaboration- as well as the Ministry of Health, Consumption and Welfare, who are co-signatories to a collaboration agreement for the preparation of these statistics. We are also grateful for the collaboration of the Spanish Committee of Representatives of People with Disabilities (CERMI) and the ONCE Foundation, bodies that contributed to the creation of this statistic.

Type of operation: Continuous annual survey.

Population scope: People from 16 to 64 years old residing in main family dwellings.

Geographical scope: The entire national territory.

Source data: integration of the statistical data provided by the Economically Active Population Survey with administrative data recorded in the State Database of Persons with Disabilities of the Institute for Older Persons and Social Services (IMSERSO)³, in the Public Benefits Register of the National Social Security Institute (INSS), in the System for Autonomy and Situation of Dependency of IMSERSO and in the General Social Security Treasury.
